Name & Surname	Signature	Date

PLEASE TAKE NOTE OF THE FOLLOWING:

- 1. An analysis request, signed copy of SAGL's quotation/proforma invoice and purchase order must accompany each sample batch.**
- UPFRONT PAYMENT WILL APPLY FOR NEW CUSTOMERS THE FIRST THREE SETS OF SAMPLE CONSIGNMENTS RECEIVED OVER A PERIOD OF THREE CONSECUTIVE MONTHS.
- Sample reference(s) documented on the analyses request must correspond with the reference(s) documented on the sample packaging.
- It is important to ensure that each sample in the consignment received by SAGL for testing is a representative sub-sample of the bulk sample (e.g. Load, shipment, batch).
- The test results of calibration/verification samples can only be guaranteed when homogeneity testing was done.
- Vitamin analyses:**
Please attach a copy of the vitamin and mineral concentrations (for each sample) to the analysis request to assist SAGL with dilutions during sample preparation.
To prevent loss of vitamin content, samples should be protected from light/heat and be packaged in dark packaging.
- Moisture analyses:** Moisture samples for dispute or calibration purposes should always be forwarded in air/moisture tight screw cap containers as environmental conditions can influence the samples' moisture content. Sample containers should always be filled to the top.
- Particle size:** A maximum of five sieves and the pan is included in the cost of a single sieve test. Customers are requested to list the sieve sizes according to their product application. Please refer to SAGL's website for a list of available sieves.
- Uncertainty of measurement of all the SANAS accredited methods are available upon request.**
- If available, sealed arbitration samples are retained for one month by the SAGL for future reference.
- Additional information is available on SAGL's website on www.sagl.co.za, select "Services" and "Types of Analyses".
