

**TABLE 10: MYCOTOXIN RESULTS - SORGHUM CROP QUALITY 2021/22**

Note:

the lowest concentration level that can be quantified with acceptable precision and by the limit of quantitation (LOQ).

**Limit of quantitation (LOQ)** means the lowest concentration level

A concentration measured below the LOQ is reported as <LOQ.

Limit of detection (LOD) is the lowest concentration level that can be detected but not quantified and is 50% of the LOQ of each mycotoxin.

A concentration measured below
